Professional Summary

Software Engineer with 15+ years of experience architecting and shipping scalable, high-performance web applications and microservices. Expert in full-stack development (modern JavaScript frameworks, Node.js, Python, Java, .NET), relational/NoSQL databases, cloud infrastructure (AWS, Docker, Kubernetes), and AI API integration. Recognized for guiding development teams, modernizing legacy architectures, and transforming complex requirements into reliable, user-centric software.

Technical Skills

- **Languages:** JavaScript (ES6+), Python, Java, C# (.NET), C++, PHP, Kotlin, Ruby, Dart, SQL
- **Frontend:** React, Next.js, Vue.js, Flutter, HTML5, CSS3/SASS, Figma
- **Backend & APIs:** Node.js, Express, RESTful & GraphQL APIs, Microservices, Systems Architecture,
- **Databases:** PostgreSQL, MongoDB, MySQL, Oracle, SQL Server, ORM/ODMs
- **DevOps & Tools:** AWS, Docker, Kubernetes, CI/CD, Git/GitHub, AI Tooling/LLM APIs
- **Leadership:** Technical Leadership, Agile/Scrum, Code Review, Testing, Mentoring, project Management

Professional Experience

Lead software Engineer

Furtu |

Oct 2024 – Present

- Own technical design, project scope, and team deliverables across cross-functional engineering teams, aligning deliverables with stakeholder requirements and budget/timeline constraints — driving a 25% increase in project success rate and client satisfaction.
- Architect and build scalable microservices and MERN-stack applications supporting 10k+ concurrent users with zero performance degradation, improving platform performance by 40%.
- Design secure, enterprise-grade full-stack applications for diverse clients, strengthening market competitiveness and lifting user retention by 30%.
- Lead integration of third-party APIs and enterprise systems, expanding platform service offerings by 25%.
- Conduct code reviews and maintain CI/CD pipelines (Docker, Kubernetes) to raise release velocity and code quality across the team.
- Mentor engineers on architecture decisions, coding best practices, and Agile delivery.

Software Engineer

EVA-HEARD | Addis Ababa, Ethiopia

Oct 2020 – Oct 2024

- Directed end-to-end delivery of 10+ web applications across diverse technologies stacks, within tight timeline and budget constraints.
- Refactored legacy codebases and optimized backend APIs, reducing page load times by 40% and increasing client operational efficiency by 18%.
- Built automated data pipelines and internal engineering tools, eliminating manual bottlenecks and boosting team productivity by 20%.
- Designed reusable UI component and modular RESTful APIs to streamline frontend-backend integration and improve reliability.

Full-stack developer

BOLSA | Addis Ababa, Ethiopia

Dec 2018 – Oct 2020

- Engineered and maintained highly available, secure enterprise applications using Java, C# (.NET), and relational databases, serving thousands of active users.
- Developed and deployed scalable applications, APIs, and databases managing critical business data.
- Integrated robust databases into existing MIS infrastructures, expanding system capabilities, and streamlining service delivery.
- Strengthened database performance and integrity through strict security policies, routine backups, and access-control protocols.

MIS Officer

SCT-UNICEF | Addis Ababa, Ethiopia

Dec 2014 – Dec 2018

- Spearheaded migration of legacy client-server systems to modern web architecture, cutting infrastructure costs by 30% and boosting system reliability by 20%.
- Developed and optimized scalable MIS databases and backend services reducing server response times.
- Engineered custom web applications for data collection, increasing operational efficiency and user engagement by 25%.
- Integrated backend APIs and databases using the .NET framework and SQL Server.
- Collaborated with cross-functional product and UI/UX design teams to build accessible data interfaces.

Programmer

O-ICT | Addis Ababa, Ethiopia

Sep 2009 – Dec 2014

- Architected and maintained secure, scalable web applications using Java, C#/.NET, and JavaScript within cross-functional Agile teams.
- Implemented robust data security standards, role-based access controls and data protection protocols ensuring full compliance with enterprise standards.

Education

-
- **M.Sc. in Software Engineering** — HilCoE, Addis Ababa 2018 – 2021
 - **B.Sc. in Computer Science** — University of Gondar 2007 – 2009
